

Digital Skincare, Redefined: Rebuilding Trust with Gen Z

*Skincare isn't one-size-fits-all anymore — it's
algorithmic, aesthetic, and Gen Z-approved*

PRESENTED BY

Ayusee Rabha

Product Understanding & Overview

Brand Overview:

Plum is India's leading science-backed, 100% vegan beauty brand. With a strong commitment to clean, cruelty-free, and sustainable skincare, Plum has built trust across demographics through effective formulations and transparent communication.

Problem Statement

Plum's heritage in clean, vegan skincare is losing resonance with Gen Z (18-25), who demand:

- Personalization → Our static product pages don't adapt to individual needs.
 - Tech-Enabled Guidance → Competitors (The Ordinary, Curology) use AI and interactive tools.
 - Transparent Science → Young consumers want proof, not just claims.
- Without intervention, we risk becoming irrelevant to the next generation of skincare buyers.*

SOLUTION OVERVIEW:

Introducing the PlumSkin Companion — a lightweight, AI-powered, mobile-first digital skincare experience designed to deliver personalization, guidance, and product discovery aligned with Gen Z expectations.

VISION:

To be Gen Z's go-to digital skincare partner through personalized, science-first experiences.

MISSION

To re-engage young users by combining Plum's skincare expertise with tech-enabled, intuitive, and interactive digital tools.

Market Research & Competitor Analysis

Market Trends (India, 2024)

- Growth: Indian skincare market expected to reach \$4.5B by 2026 (CAGR 12%).
- Consumer Shift: Rising demand for clean, vegan, and sustainable beauty.
- D2C Boom: Online skincare sales growing at ~25% YoY.

Plum's Market Positioning

- Target Audience: Eco-conscious millennials & Gen Z.
- Price Range: Mid-tier (₹200-₹1,500).
- Top-Sellers: Green Tea range, Vitamin C serum, Niacinamide products.
- Distribution: Primarily online (Amazon, Nykaa, own website), expanding offline.

Opportunities for Plum

- Expand into men's skincare (underpenetrated segment).
- Strengthen offline retail partnerships (Shoppers Stop, Health & Glow).
- Leverage subscription models for recurring revenue.

Competitor Analysis: Plum

Mamaearth

- Known for natural & toxin-free products.
- Strong D2C (Direct-to-Consumer) presence.
- Wider product range (baby care, haircare).
- Source: [Mamaearth Website](#)

The Body Shop

- Global brand with ethical sourcing.
- Strong offline retail presence.
- Premium pricing compared to Plum.
- Source: [The Body Shop India](#)

Plum's Competitive Advantage

- ✓ 100% Vegan & Cruelty-Free (Differentiator in Indian market).
- ✓ Clean Beauty Focus (No parabens, sulfates, etc.).
- ✓ Strong Digital-First Strategy (D2C, influencer marketing).
- ✓ Affordable Premium Segment (Competitive pricing vs. global brands).

MCaffeine

- Focuses on caffeine-based skincare.
- Targets younger audience with quirky branding.
- Similar pricing to Plum.

Biotique

- Ayurvedic positioning.
- Affordable pricing, strong retail distribution.
- Less emphasis on vegan/cruelty-free compared to Plum.

Plum's Gen Z Users: Needs & Habits

Ananya (19, College Student)

- **Pain Points:** Overwhelmed by options, acne-prone, tight budget.
- **Needs:** Simple, affordable, non-comedogenic products.
- **Behavior:** Trusts TikTok skincare influencers, checks Nykaa reviews.
- **Plum Fit:** Green Tea range, 3-step routine kits.

Kaberi (24, Working Professional)

- **Pain Points:** Pollution stress, distrusts vague "natural" claims.
- **Needs:** Effective vegan actives (Niacinamide, Vitamin C), refillable packaging.
- **Behavior:** Researches ingredients, follows dermatologists on Instagram.
- **Plum Fit:** 15% Vitamin C Serum, EcoLove range.

Rohit (22, Content Creator)

- **Pain Points:** Skin reacts to trends, needs camera-ready glow.
- **Needs:** Trendy but safe products, Instagrammable packaging.
- **Behavior:** Discovers via YouTube GRWMs, swipes up on Instagram deals.
- **Plum Fit:** Glow Recipe Bundle, HA+SPF moisturizer.

Problem Identification

Key Pain Points in the Current User Journey:

Lack of Personalized Product Discovery

Gen Z users crave skincare routines tailored to their skin type, goals, and lifestyle. Plum's current platform lacks intelligent, guided recommendations.

Minimal Interactivity or Digital Flow

The site feels static. There's no intuitive quiz, camera-based analysis, or gamified onboarding — features Gen Z expects from skincare brands.

Weak Digital Engagement Compared to Competitors

While brands like Minimalist and Dot & Key use quizzes, virtual skin scans, and personalized journeys, Plum still relies heavily on basic catalog browsing.

Disconnection from Gen Z's Expectations

Plum's digital touchpoints don't feel native to Gen Z's habits — short-form content, mobile-first interfaces, swipe-based UX, and fast feedback loops are missing

Goals & Success Metrics – Rebuilding Trust with Gen Z

Strategic Goals

What this new digital skincare companion aims to achieve:

- Enhance Gen Z engagement and increase session duration on Plum's website and app.
- Drive a 30% boost in conversion through the AI-based quiz and diagnostic tool within 3 months.
- Reduce user drop-off during product discovery and recommendation phases.
- Trigger QR-driven sessions from physical product packaging to bridge offline-to-online.

Key Success Metrics

How we'll track progress:

- AI Diagnostic Flow Completion Rate
- % of users completing the skin analysis journey.
- Routine Builder Engagement
- % of users who build a full or partial skincare routine.
- Product Page Click-Through Rate
- Clicks from recommendations → product detail pages.
- Post-Recommendation Conversion Rate
- % of users who add to cart or purchase after suggestions.
- Repeat Visit Rate (30 Days)
- % of returning users after 1st diagnostic session.

Feature Prioritization – What Matters Most to Gen Z Users

Feature	Priority	Rationale
AI-powered skin quiz	Must Have	Drives personalized onboarding & product discovery
Personalized routine builder	Must Have	Converts quiz data into actionable user value
QR-triggered experience from packaging	Must Have	Connects offline users to digital flow instantly
Camera-based skin analysis	Should Have	Adds credibility and visual interactivity
Environmental sync (e.g., pollution index, humidity)	Should Have	Makes routine context-aware and smarter
Embedded skincare widget on website	Could Have	Increases accessibility beyond app
In-app influencer tips & videos	Could Have	Adds social proof & builds trust among Gen Z
AI chatbot for follow-up queries	Could Have	Keeps engagement post-recommendation
Community product reviews (filterable)	Could Have	Adds authenticity and feedback loop

AI-Powered Skincare Assistant for Plum: Personalized, Mobile-First, Brand-Led

A mobile-first, AI-powered skincare assistant designed to enhance Gen Z engagement for Plum Goodness, this digital solution personalizes product discovery and routine-building.

Inspired by Plum's existing design language and product ecosystem, the prototype integrates features like an interactive quiz, camera/environment-based insights, and dynamic product recommendations.

The experience is modular—designed for QR-triggered packaging, website embedding, and in-app deployment—with a strong focus on aesthetic visuals, micro-interactions, and brand-aligned UI/UX to match Gen Z expectations and Plum's cruelty-free, science-first philosophy.

Redesigned User Journey for Gen Z Skincare Discovery

The new user journey prioritizes personalization, engagement, and instant value for Gen Z users. It addresses previous friction points and enhances the discovery process through interactivity, visual storytelling, and AI recommendations.

1. Entry Point:

Via QR code on packaging, homepage widget, or app banner (Scan to find your routine).

2. Onboarding:

Clean splash screen with Plum logo → Start quiz CTA.

3. Skin Quiz Flow (5-7 steps):

Fun, swipeable UI with emojis, toggles, and icons (Skin type, habits, lifestyle, etc.).

4. AI-Generated Routine:

Personalized Plum product lineup shown in beautiful scrollable cards with "Add to Cart" and "Save for Later" CTAs.

5. Retention Loop:

Users can create skin profiles, get seasonal tips, and refer friends for rewards.

Go-To-Market Strategy for Plum's AI Skincare Companion

Target Audience: Gen Z users (18-25) who are skincare-conscious, socially aware, and prefer digital-first, personalized experiences.

Launch Channels:

- QR-Code Triggered Campaigns
- Launch directly from Plum product packaging with "Scan to find your ideal skincare routine" CTAs.
- Targets existing customers, drives post-purchase engagement.
- Homepage Widget Deployment
- Embedded on Plum's official website to capture organic traffic and aid discovery during browsing.
- In-App Feature Rollout
- Integrated inside Plum's existing mobile app to reduce bounce rate and improve session duration.
- Social Media Micro-Launches
- Instagram Reels, YouTube Shorts, and interactive Stories featuring influencers using the quiz/flow.
- Drives FOMO and virality via UGC (User Generated Content).
- Email Retargeting Campaigns
- Nudges dormant users to return with "Your Skin Routine Awaits" campaigns and saved quiz results.

Growth Tactics:

- Referral & Rewards
- "Glow with a Friend" program — refer friends and unlock discounts or free minis.
- Gamification
- Badges like "Routine Rookie," "Ingredient Explorer," and leaderboard ranks to retain interest.
- Seasonal Customization Pushes
- Campaigns around monsoon/summer skincare changes to keep the tool relevant year-round.

KPIs & Success Metrics

Objective: To monitor the effectiveness and business impact of the AI-powered skincare companion in driving Gen Z engagement, personalization, and conversions — from first interaction to repeat purchases.

Engagement Metrics

- DAU / MAU Ratio – Tracks stickiness and daily habit formation
- Avg. Time Spent – Indicates depth of engagement and interest
- Routine Completion Rate – % of users who complete the skin diagnostic flow
- Routine Save Rate – % who save their routine to profile/cart

Retention Metrics

- 30-Day Repeat Visit Rate – % of users who return within 30 days
- Routine Re-Engagement Rate – Users who revisit or update routine
- Repeat Purchase Rate (Gen Z) – Monitors loyalty & LTV for target audience

Conversion Metrics

- Click-Through Rate (CTR) – From AI tool to product detail pages
- Conversion Rate (Quiz → Cart) – % of users purchasing after quiz
- QR Scan-to-Session Rate – Tracks effectiveness of offline-to-digital bridge
- First-Time Purchase Rate – % of new users converting in 1st session

Goal	Target
Increase AI tool conversions	30%
Boost avg. session duration	20%
Reduce quiz drop-off	-25%
Improve QR scan-to-session rate	3x increase

Final Summary & Next Steps

This AI-powered skincare experience redefines how Gen Z connects with Plum — through personalization, tech-enabled guidance, and interactive digital flows that match their lifestyle.

By aligning Plum's science-first skincare with immersive mobile UX, the solution bridges the gap between curiosity and confident purchase decisions, all while reinforcing brand loyalty.

Key Outcomes Delivered:

- Elevated Gen Z engagement through smart, tailored discovery
- Frictionless path from skin quiz to product purchase
- Increased session retention across channels (QR, site, mobile)
- Seamless integration of Plum's values into everyday routines

Next Steps:

1. Finalize prototype polish and visual refinement
2. Conduct Gen Z-centric beta testing
3. Begin MVP development with scalability in mind
4. Deploy QR-triggered pilot on packaging
5. Roll out to website and digital widget placements
